

Semantic technologies from ontoprise

# Partner programs 2012

## Become our Partner

The ontoprise Partner Program is a worldwide initiative designed to help develop cutting-edge semantic solutions and successfully bring them to market. As the leading provider of semantic technologies, ontoprise encourages software and services companies to apply for a partnership. The solutions and the market know-how brought in by the partner combined with ontoprise's core technology will create exciting semantic solutions for the end user, yielding in this way true value for the partner, the customer and ontoprise. Join the semantic revolution, enrich your applications, connect to new markets and discover new exciting and innovate ways of living and working together.

### Programs

ontoprise offers programs for **ProductPartners** (Independent Software Vendors) and **ProjectPartners** (System Integrators and Resellers). ProductPartners integrate semantic technologies into their product suite. ProjectPartners offer semantic applications as an add-on to their software or services. ProjectPartners are offered a discount on ontoprise Software licences depending on the number of licences sold and the degree of the sales process they cover.

### Getting started

Are you interested? Please contact our partner managers at:

**Phone:** +49 721 509809-0

**Email:** partner@ontoprise.de
